WORK EXPERIENCE

JUNIOR WEB DEVELOPER FELLOW

Grassriots | January – April 2022

- Build, maintain and support projects and services for clients, including responsive websites using Wordpress custom themes and interactive lead generation and fundraising pages on Engaging Networks.
- Execute testing, quality assurance, and bug tracking to provide clients with the best quality products.
- Support clients in the preparation and publishing of online campaigns, website landing pages, and email broadcasts.

TEACHING ASSISTANT – CPSC 210 SOFTWARE CONSTRUCTION

University of British Columbia | September 2021 – December 2021

- Facilitated labs of up to 30 students to guide and support students in the completion of Java programming assignments and personal projects, as well as answer questions on course topics such as software design, computational models, data structures, debugging, and testing.
- Reviewed and marked student projects, assignments and exams following the course rubric, providing feedback to help student improve software design and engineering skills.

DIGITAL CAMPAIGNER

OpenMedia | November 2018 – July 2020

- Mobilized internet users through digital and traditional media to influence federal internet access and privacy policy.
- Wrote and published campaign materials including web content, blogs, email blasts, press releases and op-eds.
- Rebuilt organization's new supporter acquisition pages as part of organizational transition to a new CRM and website.

DIGITAL CAMPAIGNER

BCGEU | January 2017 – October 2018

- Led public policy campaigns affecting union members and B.C. workers in partnership with union leadership and members.
- Wrote and created communications materials, including magazine articles, press releases, bulletins and web content.
- Built campaign web materials using custom themes on the Nation Builder platform

SOFTWARE DEVELOPMENT PROJECTS

GAS STATION DATABASE

Web app built with PostgreSQL, Node.js and Express.js to store and filter gas stations in a given city.

ORGANIC ACIDEMIA FEEDING APP

Baby bottle feeding app built on Java to track strict organic acidemia diet for my son when he was a baby.

LOGISTICS WEB APP

Web app built with PostgreSQL, Express JS and Pug JS for the Shopify Summer 2022 Internship Application
